

KAUNG KHANT KYAW

SOFTWARE ENGINEER

Bangkok, Thailand | +66 82 883 7683 | kaungkhant.luke.dev@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Engineering graduate (3.86/4.00 GPAX) with hands-on experience shipping four production-ready full-stack web applications. Delivered 15+ scalable RESTful APIs, secured authentication systems, and interactive UI components during a cooperative internship. Currently contributing to web application development and technical process improvements in a part-time operations role.

TECHNICAL SKILLS

Languages & Frontend: JavaScript, TypeScript, Python, SQL, React, Next.js, Tailwind CSS, HTML5

Backend & Database: Node.js, Express.js, FastAPI, PostgreSQL, MySQL, Prisma, REST, JWT, RBAC

DevOps & Tools: Docker, GitHub Actions, Vercel, Neon, AWS (Fundamentals), Git, Postman, Jest

EXPERIENCE

Technical Operations Assistant (Part-Time) | Inno Mind Healthcare Recruitment Group | May 2026 - Present

- Contributed to the planning, architecture, and development of a web-based management system, translating business requirements into actionable technical solutions.
- Delivered cross-functional technical support across UK business hours, troubleshooting hardware, software, and workflow issues to minimize operational disruptions.
- Handled confidential client information with discretion while adhering to strict operational procedures and data privacy standards.

Full-Stack Developer Intern | MFessolutions Co., Ltd, Bangkok | Jan 2026 - Apr 2026

- Engineered and shipped four production-ready web applications, including corporate SPAs, admin dashboards, a bilingual directory platform, and an interactive card creator.
- Replaced manual data entry processes by integrating Google Sheets APIs to automate business data synchronization, eliminating human error and ensuring real-time data availability for production systems
- Architected 15+ REST API endpoints using Node.js, Express, Prisma, and MySQL.
- Secured dashboard access and protected REST API endpoints for multiple user roles by implementing JWT authentication and role-based access control (RBAC).
- Standardized development environments and streamlined deployment pipelines utilizing Docker, Docker Compose, and GitLab workflows.

Teaching Assistant - Programming Fundamentals | Mae Fah Luang University | Aug 2023 - Apr 2025

- Mentored 60+ students per semester, providing lab guidance, debugging support, and one-on-one programming instruction.

PROJECTS

Valentine Card Creator | React, TypeScript, Node.js, Express, MySQL, Prisma, Docker

- Engineered a full-stack interactive platform featuring image uploads, customizable text styling, and shareable links.
- Solved complex frontend rendering challenges by implementing SVG and HTML5 Canvas masking alongside dynamic unlock animations
- Containerized the application with Docker and designed backend APIs using Express.js and Prisma ORM to reliably manage user-generated content.

RENTMATE - Peer-to-Peer Rental Marketplace | Node.js, Express, MySQL, JWT, Tailwind CSS

- Architected a full-stack marketplace to manage item listings, booking requests, real-time notifications, and payment verification workflows.
- Isolated administrative and user workflows by engineering a secure authorization layer using JWT and role-based access control (RBAC).
- Designed scalable RESTful APIs and integrated backend services to streamline transaction processing.

API Sentinel | FastAPI, Python, SQLAlchemy, PostgreSQL, APScheduler, Docker | [LIVE](#) | [GitHub](#)

- Built a full-stack API monitoring platform in FastAPI and SQLAlchemy, running scheduled HTTP/HTTPS health checks (default 30s interval) and logging status codes, response times, and error details to PostgreSQL.
- Implemented alert logic that flags endpoints after three consecutive failed checks or a response-time threshold breach, with checks and alerting covered by a dedicated pytest suite.
- Built SSRF protections that reject requests to localhost, private, loopback, link-local, and reserved IP ranges and disable redirects during checks, verified by a separate URL-safety test suite.
- Secured the API with signed bearer-token authentication and Pydantic request/response validation; containerized with Docker and deployed to Railway with a managed PostgreSQL service.

EDUCATION

Bachelor of Engineering in Computer Engineering | Mae Fah Luang University | Aug 2022 – Jun 2026

GPAX: 3.86/4.00 | First Honours Degree| Co-operative Education: Full-Stack Developer Intern, MFessolutions Co., Ltd

ACTIVITIES & LEADERSHIP

Technical Support at International Student Orientation (Jan 2025): Troubleshoot presentation and A/V systems to deliver seamless rehearsal and live orientation sessions.

ARSA Volunteer Camp (May 2024): Organized educational activities and supported facility improvements during a 5-day community service camp.

LANGUAGES

English (Fluent), **Burmese** (Native), **Thai** (Learning)
